

Frequently Asked Questions

When is carpet dyeing appropriate?

When carpet cleaning is not enough, it's the solution for the carpet to look completely renewed.

Should I have some experience to dye carpets?

No. Our system can be used by people with some experience and also people that have never been into this lucrative activity.

Must I have my carpet cleaned before you can dye it?

Not with Recolor Carpet. Your carpet will be cleaned in the process of dyeing, at no extra charge, of course.

Can all carpeting be dyed?

The dyeing process is effective and can be applied to the vast majority of carpets available on the market, single or multicolored carpet.

Can I have my carpet dye any color I want?

Due to the nature of fibers and dyes, the color your carpet was originally makes a difference as to what color it can be redyed. The range of colors your carpet can be dyed will be determined upon inspection and testing of it.

What is your guarantee?

Recolor Carpet proudly guarantees that any carpet we dye will have color as permanent and as uniform as the original carpet color.

How soon after you complete the dyeing process can I walk on my carpet?

In a matter of seconds, since our dyes set immediately. However, so as not to introduce new soil into the wet fibers, it is always best to avoid walking on the carpet until it is completely dry.

How much will it cost and what's the advantage for my customer?

In most cases a full dye will save your customers up to 70% of replacement cost, or less. Spot repair is much less. Also, it saves time, the trouble of uninstalling and installing new carpet and the smell of carpet glue.

Business opportunity

Carpet Dyeing System

We are Experts
Experts in carpet
Color Correction
color

The acquisition of this new system includes:

- Complete training at our facility.
- Technical and operations manuals.
- The Marketing Plan you need to successfully operate your business.
- Initial stock of carpet dyes and chemical products to start working right away.

Besides, we have all the equipment you need. The best part is that you, as a carpet cleaner, already have most of the equipment needed, so any additional investment is minimum.

With carpet dyeing you can earn up to six times more than what you actually earn per cleaning job!

We offer your own business, not a franchise. Unlike franchises, there are no territory restrictions, so you can grow as much as you want. All the money is yours to keep, there are no franchising fees, dues or royalties

YOU PAY NOTHING AFTER THE INITIAL INVESTMENT

Concept

The concept of the Recolor Carpet Dyeing System consists in giving back new color and restore a faded carpet, leaving it totally renewed and allowing their customers to save up to 70% of replacement costs. Also, it saves time, the trouble of uninstalling and installing new carpet and the smell of carpet glue. You will master in complete dyeing on wall to wall

carpets and area rugs. You will dye them darker than the original color or even change the actual color. Also, you'll get rid of all kinds of stains, even bleach spots, that cannot be removed by any other cleaning method. Our services are quickly performed and without uninstalling the carpet, allowing to walk on them in a matter of minutes.

About us

Recolor Carpet is an Argentinian company, associated to the main carpet dyeing supplier from abroad, that has a group of engineers for developing chemical products of high technology and quality for carpet dyeing and cleaning. We've also received their great experience of

more than 25 years, the machines specially designed for this kind of service and the professional training. Our Carpet Dyeing System uses the same carpet dyes applied at the carpet mills and the color is permanent and uniform as the original carpet color.

Recolor Carpet Process:

We first vacuum thoroughly and pre-spot the carpet. We then clean, shampoo and dye the carpet in one operation. Our equipment enables us to agitate the dye into the carpet with a brush mechanism, to ensure proper cohesion, rather than simply spraying dye onto carpet surfaces. Next we rinse out excess dye and cleaning solutions along with the soiling substances. All stains

or spots will have been replaced by overall uniform, permanent color. During the rinsing process we apply a combination of sanitizer / deodorizer, which removes odors and prevents mildew. The last step is to brush the carpet pile and fluff, leaving the fibers with the same orientation. The color application is as permanent as the color applied at the carpet mill

**STAY AHEAD OF YOUR COMPETITION.
ADD THE RECOLOR CARPET DYEING SYSTEM TO YOUR BUSINESS**

With our carpet dyeing system you can offer the following services:

Complete Carpet Dyeing

This service leaves the carpet looking completely renewed and restored by adding new color. The system restores the original color and in some cases, even a whole new different color. All work conveniently done on location and guaranteed permanent and uniform. You can also dye area rugs and interior carpets from cars.

Color Enhancement

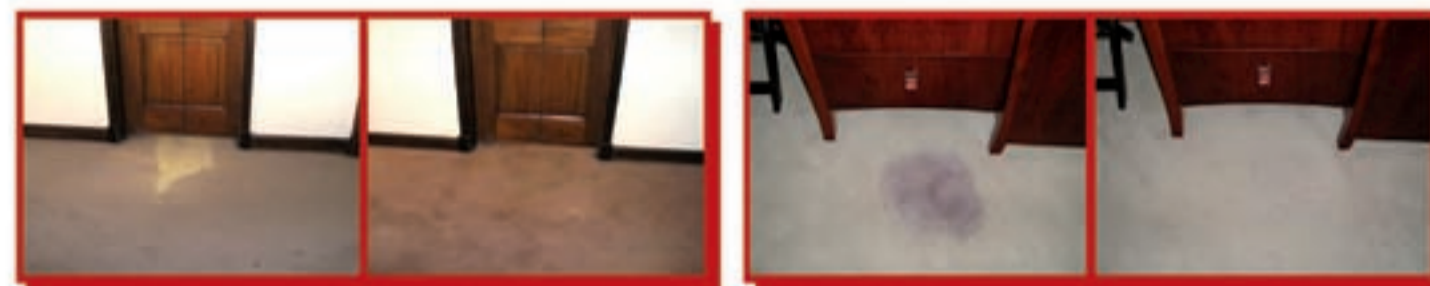

It's the adequate service to bring back the color and vibrance in carpets that shows their first signs of wear. With color enhancement, the carpet is dyed with the same hue and the same intensity as the original color.

Spot Dyeing

This service gets rid of the stains that cannot be removed by traditional carpet cleaning, such as bleach, sunfading, furniture stains, red kool aid stains, orange juice, coffee and so on. With spot dyeing it's not necessary to dye the whole carpet. We only dye the stain by matching the carpet color.

We fix bleach spots!

Besides, you can perform your usual carpet cleaning, but offering a new method:

Carpet Cleaning and Upholstery Cleaning with Dry Foam

We specialize in dry foam cleaning. This amazing proprietary cleaning system leaves the carpet dry in seconds and ready to use. It's ideal for hotel, business and any place that requires immediate transit. The foam formulation leaves no residue, so the carpet stay clean longer.
